

Re: Proceeding #95-20

Verizon's pressure upon my local isp, Pikeonline, Milford, PA, to submit to 61% rate increase is an extortionist attempt aimed at putting small local companies out of business and monopolizing internet and DSL service. Pikeonline has been forced to pass on this unwarranted increase to myself and other local intrnet users. In addition, Verizon's installation of digital lines in my area have needlessly disrupted Pikeonline's ability to provide service, forcing uninformed customers to switch isp's.
